Subject: RE: Chemours - Stop PFESAs Release

Linda:

We received your letter that was emailed to Ellis McGaughy the evening of August 29, 2017.

After reviewing your letter, it appears that the compound with the chemical structure of $C_7HF_{13}O_5S$ has the incorrect CASRN assigned to it. CASRN 66796-30-3 is for the perfluorosulfonic acid-PTFE copolymer resin instead of the C-7 compound stated in your letter.

We are beginning to investigate possible sources of the two compounds that were detected in the Chemours' Outfall 002. Our initial thoughts are that the source or sources of the compounds could possibly be associated with the Chemours' IXM manufacturing area.

We will inform you of our intended actions as you have requested.

Mike
